Dear Sir/Madam,

I am writing to express my interest in the **Flutter Developer** position. Please find my updated CV attached for your consideration.

I am a dedicated software developer with **4 years** of experience building high-quality, cross-platform mobile and desktop applications using Flutter. I specialize in developing robust systems with REST API integration, offline data synchronization, real-time data processing, AI features, and automated workflows. I recently graduated from SETEC Institute, majoring in Management Information Systems (MIS), and have continued to grow through both professional roles and independent projects.

One of my key personal projects is a fully functional social media mobile app, which includes features such as user posts (text, photo, video), real-time chat (text, image, voice call, video call, and location sharing), QR code scanning and generation, and dynamic link sharing. I published this app to the Google Play Store, App Store, and Huawei AppGallery.

Professionally, I have worked at **Tonaire Digital Co., Ltd** as a full-stack developer, where I contributed to multiple large-scale cross-platform systems (Android, iOS, Windows, macOS). My work includes **KHQR** payment integration, wallet management, real-time tracking, **AI image search**, **RFID** inventory, and CI/CD pipeline automation using Docker and Git platforms like GitHub, Gitea, and GitLab.

Additionally, I have successfully delivered freelance projects on **Upwork**, including a flashcard learning app with offline capabilities, BLoC architecture, and platform deployment. My strong communication skills, problem-solving mindset, and commitment to clean, maintainable code have consistently earned me **positive reviews** from international clients.

I would appreciate the opportunity to further discuss how my experience and skills can contribute to your team. Thank you for considering my application. I look forward to the opportunity to speak with you.

Sincerely,

Huy Panha

ABOUT ME

I am a software developer with 4 years of experience building high-quality, cross-platform mobile applications using Flutter. Skilled in developing robust systems with REST API integration, AI integration, KHQR payment integration (ABA Bank), offline data synchronization, security, automated workflows, and real-time data processing. Known for a strong work ethic, passion for learning, and commitment to delivering effective, scalable solutions that support business growth and operational improvement.

EXPERIENCES

○ **FULL-STACK DEVELOPER**
TONAIRE DIGITAL CO., LTD / 2023 - Present

I have been working as a Full-Stack Developer at Tonaire Digital, specializing in cross-platform application development using Flutter (frontend) and Express.js (backend). I have developed and maintained applications for iOS, Android, Windows, and macOS. My experience includes a wide range of features and integrations, such as KHQR payment integration (ABA Bank), digital wallet management, real-time map tracking, AI-powered image search, RFID-based inventory scanning, VPS hosting, reward-based lucky draw systems, dynamic app icons, notification management, user role and device management, and more.

I am proficient with GitHub, Gitea, and GitLab for version control, and I use Docker and Portainer for API deployment and service management. Additionally, I have experience creating automated CI/CD workflows for mobile app deployment and have successfully published applications to the Google Play Store, Apple App Store, Huawei AppGallery, and Microsoft Store.

FLUTTER FREELANCER
UPWORK / 2025

Working with international clients on Upwork to design and develop high-quality, cross-platform mobile applications using Flutter. Notably contributed to the development of a Cross-Platform Flashcard App for offline use, featuring randomized and editable content with local storage powered by flutter_hive_ce. Successfully managed BLoC architecture, offline data management, and deployment for both iOS and Android.

Demonstrated strong ability to understand customer needs, write clean and maintainable code, provide technical documentation, and manage the full development cycle, including CI/CD workflows, automated testing, and GitHub-based deployments. Consistently received positive customer feedback for clear communication, reliable delivery, and proactive problem resolution in a remote and collaborative environment.

FLUTTER FREELANCER
ANGKOR SYSTEM / 2023 - 2025

Developed a cross-platform Point of Sale (POS) system using Flutter & Express JS. Proficient in leveraging Flutter frameworks, components, and tools to build scalable applications. Experienced in integrating and utilizing native APIs for Android, iOS, and macOS. Skilled in debugging, performance optimization, and packaging. Successfully built and deployed release versions for multiple platforms, including Android, iOS, macOS, Windows, and Web.

FLUTTER DEVELOPER
PISES / 2021 - 2023

Between 2021-2023, I have been independently building a cross-platform social media mobile app using Flutter. The app includes key features such as text, photo, and video posting; real-time chat with support for text, images, voice calls, video calls, and location sharing; QR code scanning and generation; and integration with Firebase Dynamic Links for seamless sharing and deep linking. I built and refined production-ready releases for both Android and iOS, and successfully published the app on the Google Play Store, Apple App Store, and Huawei AppGallery.
